11D High Intensity Focused Ultrasound (HIFU) uses focused ultrasound energy to target a specific layer in the skin called the **Superficial Musculoaponeurotic System (SMAS)**. This is the same layer that surgeons usually address during cosmetic surgeries like facelifts to tighten and lift the skin. HIFU is a non-invasive or minimally invasive procedure that stimulates collagen production and helps tighten and rejuvenate the skin.

HIFU works differently from lasers and other devices. Instead of treating the skin's surface, it delivers energy deep into the skin at the right depths.

The results are noticeable right away, but the best improvements happen over two to three months as new collagen forms, which naturally lifts and tightens the skin. The skin continues to improve for up to six months after the treatment.

		<p>4.5MM DEPTH FIBER FASCIA LAYER Forms thermal solidification in the SMAS Layer.</p>
		<p>3.0MM DEEP UNDER THE DERMIS Forms thermal solidification in the Dermis Layer.</p>
		<p>1.5MM DEEP IN THE DERMIS Thermal freezing point on the Upper Layer.</p>
		<p>LIFT The handle promotes contraction and regeneration of collagen.</p>

Reducing wrinkles around the forehead, eyes, mouth, and body.

Lifting and tightening the skin on both cheeks.

Significantly reduce fine lines & wrinkles - whilst lifting and rejuvenating skin and promoting new collagen & elastin.

Improving the jawline, jowls and reducing sagging.

Tightening skin tissue on the forehead and lifting eyebrow lines.

Enhancing skin complexion, resulting in delicate and radiant skin.

Can be combined with beauty injections like hyaluronic acid and collagen to address additional signs of aging.

Removing neck wrinkles and preventing neck aging.

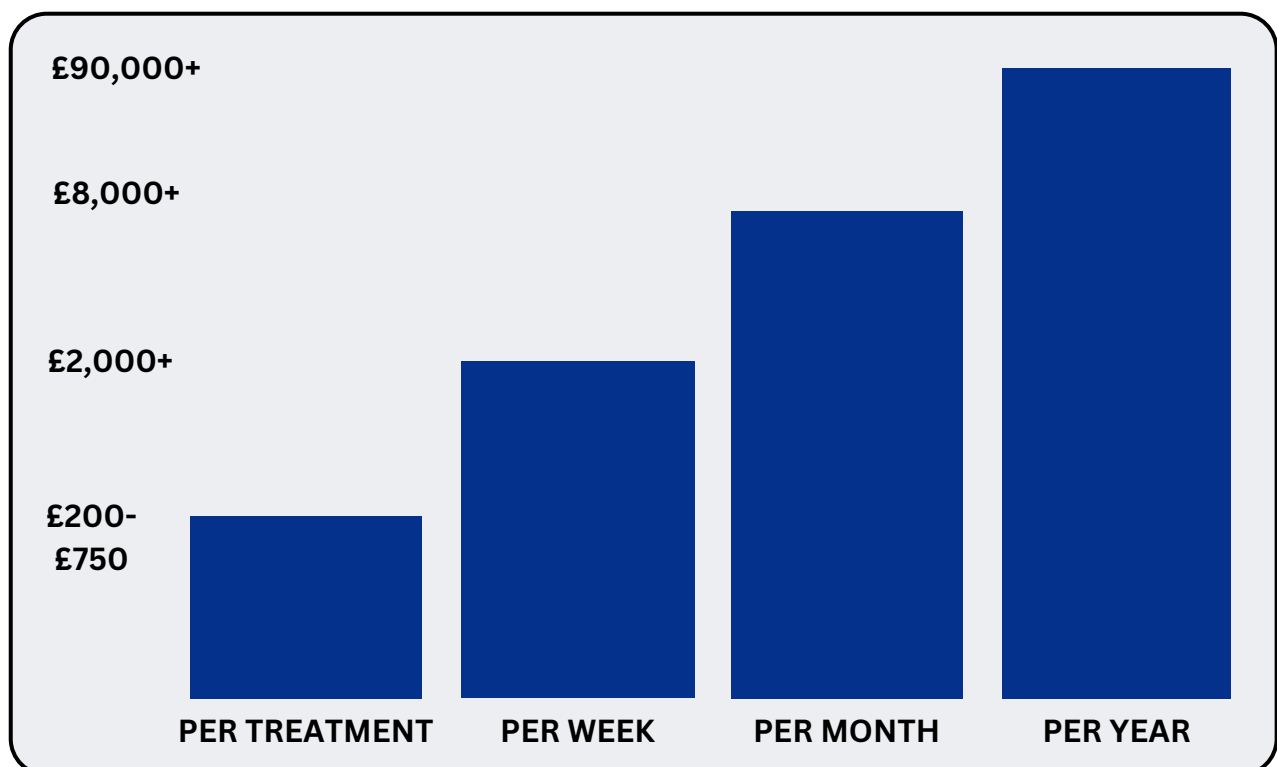

Powerful, safe & accurately targeting depths of SMAS, tissue & skin fibres on all treatment areas.

Full face treatment

Crows feet & under eye lines

My clients have noticed significant and immediate visual differences immediately after one session of 11D HIFU skin tightening treatment and the results will continue to improve over 12 weeks. Jowls are lifted and under eye lines and wrinkles are greatly improved and smoothed. I'm so happy with this machines results.
